Building of America Award

Real Estate & Construction Review Announces Pier 40, The Embarcadero as a Building of America Award Winner

Southfield, MI - The *Real Estate & Construction Review's* editorial board is currently reviewing the region's outstanding new construction and renovation projects. From hundreds of nominated projects, Pier 40, The Embarcadero, (submitted by BCCI Construction Company), has been selected as a Building of America project and will be featured in the upcoming *Real Estate & Construction Review- Northwest Edition*.

The *Real Estate & Construction Review-Northwest Edition* will honor Northwest's most innovative, unique and challenging new projects — projects that are particularly noteworthy and/or that give back to their respective communities. The publication is an essential link, bringing owners together with the consultant, design and construction industry nationwide by profiling new construction and renovation projects in a case-study format.

Each Building of America project is highlighted in a case study that intertwines the words of the project's owner/developer, consultants, architects and contractors to explain how the teams worked together. Each regional edition will also contain listings, advertisements, corporate profiles and additional information about the project team members, subcontractors, vendors and suppliers that contributed to the project's success.

The Real Estate & Construction Review has been published by Construction Communications since 1997. Each regional edition is published annually and features the region's top projects as determined by our editorial board. Through its publications and online search engines, Construction Communications is building a network of the nation's most important, innovative and unique projects, owners, consultants, project team members, subcontractors and suppliers to help connect those responsible for building America's future. Each edition will also be available online at www.constructionreviews.com. The website, accessed by industry leaders and decision makers throughout the country, combines more than 50,000 links and millions of searches each year.
